DETAILED ACTION

Applicant's amendment in the reply filed on 11/26/07 is acknowledged. Any rejection that is not reiterated is hereby withdrawn.

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/26/2007 has been entered.

Claims Pending

Claims 72-77, 80-91, and 94-100 are pending. Claims 1-71, 78-79, and 92-93 are cancelled. Claims 83-86, and 97-100 are withdrawn. Claims 72-77, 80-82, 87-91, and 94-96 are examined on the merits.

Specification/Abstract Objections

Specification

The disclosure is objected to because of the following informalities: The specification recites "novel" on pages 1, 6, and 12. It is suggested that the term "novel" be deleted from the language of the specification. Once the determination of the novelty of a claimed invention has been established and the disclosure of the invention made public and/or

patented, the claimed invention is no longer novel or new, since the scope of the invention no longer embraces what is considered "novel". Thus, the incorporation of the term "novel" into the language of the specification is not appropriate. Correction is required.

Claim Rejections –35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent

Claims 72-77, 80-82, 87-91, and 94-96 are rejected under 35 USC § 102 (a) as being anticipated by Ozaki et al (Biological & pharmaceutical bulletin, (1996 Aug) Vol. 19, No. 8, pp. 1046-8).

Ozaki et al teach the cut dried fruit of *T. Kirilowii* was refluxed (thus heated at boiling temperature 78 °C) with 50% ethanol solution (thus contacting plant with solvent to form a mixture) three times for 6 h each time. The solutions were filtered through gauze and then freeze-dried to give powdered extract (page 1046, 1st column, 4th paragraph). Ozaki et al also teach that the extract has anti-inflammatory effect.

These are product-by-process claims. The 50% ethanol solution extract of *T. Kirilowii* inherently contains the pharmaceutical composition that is being currently claimed, and the composition is deemed to have the physical properties such as retention time on high performance liquid chromatography.

The intended use of the composition was analyzed for patentable weight. It is deemed that the preamble 'breathes life' into the claims in that it is deemed that the prior art product must not be precluded for use to induce hemoglobin synthesis in human K562 cells, especially in the absence of sufficient, clear, and convincing evidence to the contrary. It is deemed that the composition disclosed by Ozaki et al. is not precluded for carrying out the intended function of the claims.

Therefore, the reference is deemed to anticipate the instant claim above.

Conclusion

No claim is allowed.
